## About me

---

I began my software testing journey at RoSite in February 2020, where I discovered a passion for ensuring software reliability. I find fulfillment in actively working on various tasks, valuing continuous learning and collaborative teamwork. My goal is to expand my expertise in both manual and automated testing, contributing significantly to the creation of robust software solutions, while growing professionally in a dynamic work environment. I am eager to embrace new challenges and learning opportunities.

You can find a more refined and detailed introduction about me, including an in-depth overview of my professional experience, at the following link.

## Professional experience

---

Experience by departments	IT Software : 11 years and 10 months
---------------------------	--------------------------------------

<b>May 2023 - present</b>	<b>Quality Assurance Tester - INDUSTRIAL SOFTWARE</b>
---------------------------	---

1 year and 10 months

Remote (from home) | IT Software | IT / Telecom

- Analyze and create manual test scenarios for 56 projects, using Jira to document the scenarios and report bugs.
- Participate in automating 20% of these projects within a year, using Java and Selenium, with Maven and TestNG for execution, and Jenkins for continuous integration (CI).
- Monitor and maintain over 120 hours of automated test execution.
- Continue the automation process for ongoing projects.
- Implement and manage continuous integration and continuous delivery (CI/CD) pipelines using Jenkins, ensuring that automated tests run as part of the build and delivery process.
- Use GitLab and Git Extension to monitor new changes, manage commit history, and collaborate efficiently with development teams.
- Collaborate with 3 different development teams, totaling 16 developers.
- Fix bugs in the developed applications where necessary.
- Analyze and propose ideas for improving the applications, making them more

user-friendly.

### **Mar 2022 - May 2023 Manual Quality Assurance Tester - Bosch Global Service**

1 year and 3 months

Timisoara | IT Software | IT / Telecom

- Manual testing on the databases of 4 applications using MySQL, PowerBI, SAP, and an internal Bosch application.
- Performing User Acceptance Testing (UAT) and Functional Testing (FT).
- Writing test scenarios and documenting results in Jira.
- Conducting regression testing after database updates performed by the development team.
- Updating application logs and making them available to customers.
- Manual testing of Bosch's internal web application and performing front-end corrections, such as link replacements, text corrections, and design adjustments.
- Implementing Agile testing methodologies.
- Conducting daily system error checks in SAP, resolving issues, and updating documentation based on new releases developed.
- Using Jira and Microsoft Excel for functional testing, bug reporting, and Agile testing.

### **May 2013 - Mar 2022 Computer Operator - Editura Datagroup**

8 years and 11 months

Timisoara | IT Software | IT / Telecom

- Executing OCR (Optical Character Recognition) processes to extract and convert text from scanned documents or images into editable format.
- Editing and formatting LexisNexis Austria magazines, ensuring that the documents meet quality standards and comply with editorial requirements.
- Generating XML files to organize and structure information in a manageable and processable format.
- Marking Word documents for HTML code generation, necessary for the online publication of materials.
- Creating internal tools to improve processes and marking efficiency using VBA, aimed at automating and optimizing the workflow. With these tools, I managed to reduce document marking and formatting execution time by 75%, significantly improving the process efficiency.

### **Feb 2020 - Feb 2021 Manual Quality Assurance Tester Web Application - RoSite**

1 year and 1 month

Bucharest | IT Software | IT / Telecom

- I performed manual testing on a web application, closely collaborating with a team of 2 developers to validate new implementations and functionalities.
- I created and managed test scenarios in Trello, documenting all test cases and ensuring they were clear and easy to follow for subsequent regression testing.
- Additionally, I actively contributed to the improvement of the application by proposing solutions and optimizations, with the goal of enhancing performance and user experience.

## **Education**

**2020 - 2023**

**Bachelor's degree - Faculty of Economics and Business Administration**

Economic and Informatics | Timisoara

# Foreign languages

---

**English:** Advanced
